

BetCrash Staff Identity & Access Management (IAM) Plan

Version 1.0

Objective

Secure onboarding, management, auditing and offboarding of administrative staff.

Hierarchy

Super Admin, Operations, Finance, Compliance, Marketing, Technical Admin, Developer, DevOps, Support and Read Only Auditor.

Onboarding Flow

Create Staff → Department → Role → Permissions → SMS Invitation → Password Creation → Phone Verification → Activation.

Staff Profile

Staff ID, name, phone, email, department, role, manager, employment status, login history and security status.

Statuses

Pending Invitation, Active, Suspended, Locked, On Leave, Resigned and Archived.

Permissions

Role templates with least-privilege access and optional custom permissions.

Invitation

Secure SMS invitation with expiry and self-service activation.

Login Security

Track device, browser, OS, IP and require SMS verification for new devices.

Dashboard

Monitor online staff, failed logins, pending invitations, locked accounts and activity.

Audit Logs

Capture every admin action with actor, timestamp, target, device and outcome.

Backend

Modules: staff, invitations, roles, permissions, departments, sessions, activity, security, onboarding and settings.

Database

Staff, Roles, Permissions, StaffInvitations, StaffSessions, StaffDevices and StaffAuditLogs.

Recommendations

Use UUIDs, soft deletes, permission caching, searchable staff directory and comprehensive audit trails.
